

EFFECTIVE JULY 30, 2016

Aberdeen Municipal Code

Chapter 15.36

ELECTRICAL CODE

Sections:

- 15.36.010 Adoption of code.
- 15.36.020 Conflict of provisions.
- 15.36.030 Electrical inspector--Duties.
- 15.36.040 Aluminum conductors.
- 15.36.060 Electric fence.
- 15.36.070 Stop orders.
- 15.36.080 Licenses required.
- 15.36.090 Permit required.
- 15.36.100 Permit fees.
- 15.36.110 Unsafe wiring.
- 15.36.120 Notice and order.
- 15.36.130 Violations.

Section 15.36.010 Adoption of code.

Chapters 296-46A, B, and C, except subsections (10), (11), (12), (13), (14), and (15) of Section 256-46B-906, of the Washington Administrative Code, and the codes and standards adopted by reference therein, are adopted by reference as the electrical and telecommunications code of the City, subject to the provisions of this chapter. A copy of each code adopted by reference in WAC 296-46B-010 shall be maintained at City Hall for use and examination by the public. (6482, Amended, 04/22/2009; 6363, Amended, 07/28/2004; 6287, Amended, 05/02/2001; Ord. 6215, Amended, 05/12/1999; 6188, Amended, 07/01/1998; 6159, Amended, 08/06/1997)

Section 15.36.020 Conflict of provisions.

In any instance where this chapter requires an equal, higher, or better standard of construction and an equal, higher, or better standard of materials, devices, appliances, and equipment than that required by codes adopted by reference in WAC 296-46B-010, the terms of this chapter shall govern. In all other cases where the provisions of this chapter conflict with a provision of chapter 296-46B WAC, as adopted by reference herein, the terms of chapter 296-46B WAC shall govern. (6363, Amended, 07/28/2004; 6287, Amended, 05/02/2001)

Section 15.36.030 Electrical inspector--Duties.

An electrical inspector shall be appointed by the director of public works and, together with such inspectors or assistants as may be hired by the city, is authorized and directed to enforce all of the provisions of this chapter. (Prior code § 2.11.030)

Section 15.36.040 Aluminum conductors.

The use of aluminum conductors is prohibited unless otherwise approved for a specific use by the electrical inspector. (Prior code § 2.11.050)

Section 15.36.060 Electric fence.

It is unlawful for any owner, lessee, or person in possession of any building or property, to construct, maintain, place, or allow to be constructed, maintained or placed on, about or upon such building or property, any fence, barrier, partition or obstruction electrically charged or connected with an electrical source in such a manner as to transmit an electrical charge to persons, animals or things which might come in contact therewith. (Prior code § 2.11.070)

Section 15.36.070 Stop orders.

Whenever any work is being done contrary to the provisions of this chapter, the electrical inspector may order such work stopped by notice in writing served on any person engaged in doing or causing such work to be done, and any such person shall forthwith stop such work until authorized by the electrical inspector to proceed with the work. (Prior code § 2.11.080)

Section 15.36.080 Licenses required.

No person or persons except those duly licensed by the state of Washington and having a city business license or the owner shall do any wiring or work regulated by city ordinances upon any premises within the city or city-owned property or right-of-way. (Prior code § 2.11.090)

Section 15.36.090 Permit required.

No person, firm or corporation shall do any electrical wiring in the city, or cause the same to be done without first obtaining a separate electrical permit for each separate electrical project, building or structure. The person, firm or corporation shall provide the city all information necessary for issuance of said permit. If work authorized by a permit is not started within one hundred eighty (180) days or is suspended or abandoned at any time for a period of one hundred eighty (180) days, the permit is null and void and before work can be started or recommenced, a new permit shall be obtained and one-half (1/2) of the permit fee paid. No electrical permit shall be required for "like-in-kind" replacement as defined by WAC 296-46B-100 and as excepted by WAC 296-46B-901(8). (6482, Amended, 04/22/2009)

Section 15.36.100 Permit fees.

A. All inspection and permit fees shall be paid prior to connection by the serving utility. Electrical power connections to a mobile home shall not be made by the serving utility until an inspection of the tie-down installation has been made and approval given by the city Building Department. All inspection requests shall be made twenty-four (24) hours in advance.

B. Inspection fees shall be as established by chapter 296-46B WAC, provided that double fees will be charged for:

1. Installations that are covered or concealed before inspection.
2. Failure to obtain a permit prior to beginning the installation or alteration, or failure to obtain permits for emergency repairs to existing by the next business day after beginning the emergency repairs.

(6363, Amended, 07/28/2004; 6287, Amended, 05/02/2001; 6159, Amended, 08/06/1997)

Section 15.36.110 Unsafe wiring.

If it is determined by the electrical inspector that unsafe wiring exists which constitutes a fire hazard or is otherwise dangerous to human life, safety or welfare, the electrical inspector shall be authorized to order the public utility district to disconnect or cause to be disconnected electrical service to the site of the hazard until the hazard is repaired or removed to the

satisfaction of the electrical inspector. The electrical inspector shall, upon finding electrical hazard, do one of the following to cause removal of hazard:

A. If in the opinion of the electrical inspector an extreme hazard exists, the inspector shall immediately have the service disconnected with or without prior notice to any party. Notice must be given within five working days after the disconnect in writing specifying the reason for discontinuing service. The order by the electrical inspector to the public utility district may be verbal, but must be reduced to writing within five working days after the verbal order and method of service on the owner shall be as specified in Section 15.48.090.

B. Discontinue electrical service when the building or structure becomes vacant. Written notice to have service discontinued upon vacancy shall be given to the public utility district and owner as specified in Section 15.48.090.

C. Discontinue electrical service when repairs and corrections have not been completed or made within a time limit as determined reasonable by the electrical inspector. Written notice shall be given to the public utility district and the owner as specified in Section 15.48.090. (Prior code § 2.11.120)

Section 15.36.120 Notice and order.

The notice and order shall contain the following:

- A. The notice shall be written except as otherwise provided in 15.36.110;
- B. The street address and a legal description sufficient for identification of the premises upon which the building, structure, or hazard is located;
- C. A statement that the electrical inspector has found a hazardous condition with a brief and concise description of the conditions found to render the determination;
- D. A statement of action required to be taken as determined by the electrical inspector;
- E. A statement of action that has been or will be taken if the hazardous condition is not removed; and
- F. A statement advising that any person having any record title or legal interest in the building or structure may appeal from the notice and order any action of the electrical inspector to the board of appeals; provided, the appeal is made in writing and filed with the electrical inspector within thirty (30) days from the date of service of such notice and order; and that failure to appeal will constitute a waiver of all right to an administrative hearing and determination of the matter. (Prior code § 2.11.130)

Section 15.36.130 Violations.

Any person, firm, or corporation causing or permitting any electrical wiring, appliances, or equipment to be used or installed in violation of this chapter, or in violation of the National Electrical Code as adopted, shall be guilty of a misdemeanor and, upon conviction, shall be punished by a fine not to exceed five hundred dollars (\$500.00), or by imprisonment in the city jail for a period not to exceed ninety (90) days, or by both such fine and imprisonment. Each day that a violation continues shall constitute a separate offense. The punishment provided in this section shall be deemed supplementary to any other recourse available to the city in such cases. (Prior code § 2.11.140)

CITY OF ABERDEEN ELECTRICAL DEPARTMENT

200 EAST MARKET STREET, ABERDEEN, WA 98520-5207
(360) 537-3275 FAX (360) 537-3350

ELECTRICAL WORK PERMIT APPLICATION

Please complete the following information, include completed electric fee worksheet [either residential or commercial/industrial work] and return with electric permit fee to the above address. [Please make checks payable to City of Aberdeen].

NOTE: The City of Aberdeen performs electrical INSPECTIONS on Mondays, Wednesdays, and Fridays ONLY. To schedule an inspection please call (360) 537-3217 no later than 3:00 pm of the prior work day. When calling in an inspection request, please have permit number, job address and type of inspection requested. Thank you.
